

The most advanced parking guidance system on the planet.

As a total solutions provider we can tailor custom solutions specifically for your needs. INDECT is just one of the products we offer as part of our Total Solution Approach.

Statistical analyses and detailed reports give you a comprehensive overview of vehicle flows and the occupancy of your parking facility. You need only define the analysis parameters. As an operator, you can respond rapidly to the obtained data and take measures to improve your business, for example, install more disabled spaces etc.

Passion, know-how and continuous advancement are combined in INDECT's products. With INDECT Parkway we can bring operators their deserved competitive advantage: optimized space administration to increase your car park occupancy significantly. Your customers will benefit from enhanced services through easy driving and parking in your car park. INDECT is a 99.9% accurate state-of-the-art single space administration and parking guidance system.

TECHNICAL

INDECT Space Indicators show whether a space is occupied or free. In addition, the integrated RGB LED allows indication of special special (e.g. handicapped, expectant mother, reserved, etc.) through clearly definable colors.

DESCRIPTION

- High-quality and super bright RGB LED and 50° lens
- LED color can be individually selected and changed at any time to highlight or reserve spaces for special user groups (e.g. family - white, handicapped - blue, zoned parking - pink, etc.)
- LED brightness individually adjustable at a mouse click to adapt to ambient light (ceiling light, daylight)
- Daylight compatible LED
- Day/night dimming possible via IVIS user interface
- System is customizable to your needs
- Quick installation
- Low maintenance
